## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-10, drawn to a method for ordering goods and/or servers via computer-networked system implement by a facilitator, classified in class 705, subclass 26.
- II. Claims 11-20, drawn to a payment transaction via an electronic network enabled by facilitators, classified in class 705, subclass 39.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as a payment transaction via an electronic network enabled by facilitators. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter and different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to Mr. Vincent Moneymaker on September 9, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 3625

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
